ABOUT ME

As an Full stack developer, I specialize in MERN (MongoDB, Express.js, React, Node.js) and Nest.js development. Also Proficient in Jira and Git, I create efficient backend solutions that seamlessly integrate with the MERN stack. On the frontend, I excel in designing dynamic user interfaces with React and Next.js, collaborating across teams and utilizing Jira for streamlined project management. My active engagement in code reviews ensures high-quality codebase, while my commitment to staying updated with industry trends drives continuous improvement.

WORK EXPERIENCE

Mythod

Jeddah, KSA, Remote

Associate Software Engineer

May 2023 – Present

- Specialized in full-stack development using the MERN stack (MongoDB, Express.js, React, Node.js) along with Nest.js for scalable backend architectures.
- Designed and implemented efficient backend services with Nest.js, ensuring seamless integration with frontend applications.
- Developed dynamic, responsive, and user-friendly interfaces using React.js, following modern UI/UX practices.
- Actively participated in code reviews, improving code quality, maintainability, and overall team standards.
- Used Jira for task tracking and Git/GitHub for version control in an Agile development environment.

Business Solutions and Services

Karachi, Pakistan

React JS Developer

March 2022 – April 2023

- Built and maintained reusable UI components using React.js, Redux, and modern JavaScript workflows.
- Implemented state management solutions using Redux / Redux Toolkit for scalable applications.
- Integrated Material UI as a design system to ensure consistency and responsiveness across the product.
- Collaborated with backend developers to ensure smooth frontend-backend communication.
- Improved UI performance and maintainability through component optimization and clean code practices.
